Poppopoppookyuun!. All you need to do, is set narrator to Poppo, have all your friends play as Poppo, and you can say goodbye to your sanity.

Shut up and take my money. Yuki: Sounds like a bully, like she should.

Fernet: Princess of the sky, a bit of a spoilt prick.

Hime: Super cute and playful, as expected.

Poppo: ... Poppo po poh.. A voice for Hime.

That is all.. pokyu pokyu poppo

pokyu pokyu poppo

I will never not give Fruitbat Factory my money.. Get it just to hear Poppo say "you" when you bully her.. Yuki: It's Bullying Time!

Fernet: Sweet ojou-sama Tsundere Voice

Hime: Cute and Loveable, especially when she say "Kya"

Poppo: Poppo?.POKYAH! POPOPOPOPOPO (i use her voice as system voice). The 100% Orange Juice Core Voice Pack 1 takes the idea of each character's personality and archetype and provides a *very fitting voice for each character; to me, they sounded exactly like how I thought they'd sound. If you don't like a voice for whatever reason, there are audio level adjustments in the options menu to dampen or mute each individual character's voices, as well as the option to voice only the character you're playing as.*

Fernet's voice is the more arrogant spoiled ojou-sounding voice, and her lines express it perfectly - as does her character (from what little of her character is exposed from non-FRB players).

Yuki's voice is low, tomboyish, brash and just oozes of confidence and authority, as you'd expect from her position as the leader of Waruda... Do I even need spoiler tags for this?. As an announcer, her "cardo draw" voice sounds like she'd make a good Jojo's Bizarre Adventure fandub narrator.

Hime's voice... I don't really like that much. It fits her character, as it's rather airy and lighthearted, reserved with a touch of elegance and playfulness that begets a small hint of mischievousness. To me, though, it sounds like she has a slightly sore throat but otherwise it is acceptable.

Poppo's voice is, pun intended, the star of the pack. The real reason you should get this DLC. She only speaks in "po" syllables and similar syllables, and even as an announcer, each "po" syllable is emphasized with the same intonations and cadences as the other announcers, so you can strangely follow along and actually understand what she's saying if you've played the game long enough. It's... actually kind of scary in hindsight. The voice is just as cute-yet-egregiously-obnoxious as you'd expect, and she even speaks out of turn if another player is taking their time to perform an action; It's not a bug, it's a feature, and I hope it stays because it adds that finishing touch to the essence of what Poppo is as a character.. Just bought it.

Poppo is love, Poppo is life. After playing 5 games with Poppo only, you will lose the ability to communicate with another human being.. They all sound great and the text is really nice.

Poppo has the power of language now.
